- Experienced Software Engineer with a strong track record solving business problems using advanced algorithms, machine learning, and functional programming
- o Proven ability to design and implement optimized data pipelines, perform data analysis, and deploy machine learning models in a production environment

Experience

01.2020-now Senior Software Engineer, Dun & Bradstreet, San Jose, CA

Company profiles, B2B. Data Engineering, Fuzzy search, Clustering

- Increased search hit rate by 4% by developing Spelling correction module. Applied Trie as BloomFilters, Count-min-sketch for language models. 7M unique words, 55M pairs, 55M triples.
- Researched and developed a de-duplication method for 450M company profiles. Locality sensitive hashing, MinHash, Trie as BloomFilters for Hamming distance. Found 7M exact and fuzzy duplicates.
- \odot Implemented Verification and Identification services that match web domains to companies. 60M websites scale.

Technologies: Scala, Python, Postgres, ML, AWS

07.2014 - Senior Software Engineer, Piano Media, Izhevsk, Russia

- 01.2020 Platform for paywall and subscription business. Distributed systems, ML, Reports, DSL, Streaming. 200 Tb data in total, $5000 \, rps_{avg}$, $8000 \, rps_{peak}$ daily.
 - \circ Launched Likely-to-Subscribe and Likely-to-Churn ML projects, 10M users
 - Led and built a project that provides various types of analytic reports, real-time, on-demand, customizable reports based on DSL. Connected Clojure-based DSL with Spark and BigQuery.
 - \odot Implemented User Segmentation Engine, 100Musers, used Bloom filter as KV-store Technologies: Scala, Clojure, Unix, Spark, HDFS, DSL, AWS, Akka, Kafka, Catboost, BigQuery
- 08.2013- Researcher, Senior Algorithm Engineer, Huawei Research, Moscow, Russia
- 07.2014 Nested data parallelism model, distributed systems, map-reduce, optimization compiler, meta-programming and code generation, domain specific languages
 - o Implemented Spark backend for nested data-parallelism model
 - O Researched and developed efficient custom Spark RDD's for NDP-primitives

Technologies: Scala, Spark, Distributed Programming, C++

12.2007 - Senior Software Engineer, Rosneft, Izhevsk, Russia

- 08.2013 Oil mining, forecast, and monitoring system. OLAP, up to 2M data points per document, up to 15 dimensions, DSL, Calculations
 - \circ Increased calculation speed by 3.5 times using multithreading evaluations
 - O Pioneered testing and verification via Partial evaluation

Technologies: C#, Multithreading, DSL, Partial evaluations

Education

2010 **Ph.D.**, Udmurt State University, Institute of Control Sciences V.A. Trapeznikov Academy of Sciences, Izhevsk, Moscow, Russia

Key words: online string algorithms, string matching, text indexing, dynamic suffix arrays, data compression. Advisor: prof. Nepejvoda N. N.

2006 MS in Computer Science, Udmurt State University, Izhevsk, Russia

Summa cum laude. Master thesis: Limited proof programming (Floyd-Hoare logic, annotated program, static verification, compiler)

CS Interests

graph theory, number theory, formal languages, string matching, data structures domain-specific languages, functional programming

Skills

Data Spark, Druid, Kafka, Rabbitmq, ML LogReg, CatBoost, Transformers

Big Query, Akka, SQL, Clickhouse

Infrastructure AWS, S3, EC2, LB, ECS, Docker Culture Tests, CI/CD, Code Reviews, Dashboards,

Monitoring

ACM ICPC

coach 2012, World Final, Poland, Warsaw participant 2005, 2006, NEERC

Schools and conferences

DSLDI 2015 Summer School on DSL Design and Implementation, Aug 2015, Lausanne, Switzerland

EWSCS 2014 Estonian Winter School in Computer Science, Mar 2014, Palmse, Estonia

ALMADA 2013 School on Algorithms for Massive Data, Aug 2013, Moscow, Russia

Russir 2011 Russian Summer School in Information Retrieval, Aug 2011, Saint Petersburg, Russia

SSSEV 2011 Summer School in Software Engineering and Verification, Jul 2011, Moscow, Russia

Russir 2010 Russian Summer School in Information Retrieval, Sep 2010, Voronezh, Russia

conferences HighLoad++-2019, HighLoad++-2015, HighLoad++-2014, META-2016, META-2014, NSKF-2013, NSKF-2014, ULMCAMP-2014, Scalar-2017, STACHKA-2017, LambdaWorld-2017, f(by)-2017, Scalar-2018, Scalar-2019, f(by)-2019, f(by)-2020, fpure-2019, f(by)-2022

Main publications

D. V. Urbanovich, P. G. Ajtkulov, "Simple algorithm to maintain dynamic suffix array for text indexes", RuSSIR/EBDT, (2011), 40-45.

P. G. Ajtkulov, "Symbol array processing", UBS, 28 (2010), 126-178. (rus)
